Subject: Humboldt Bay Repowering Project

Good afternoon,

I conducted a field review of the PG&E Humboldt Bay Repowering Project site with representatives from PG&E, LACO Associates, and CH2M Hill on May 22, 2007. We walked the entire project area to determine if a DFG Streambed Alteration Agreement (1602 Permit) would be necessary for any of the proposed project activities. Due to the lack of construction activities which may substantially alter or modify the bed, bank, or channel of the slough to the east of the project area, DFG concludes that a 1602 permit will not be necessary at this time. If the scope of the project changes significantly from the one reviewed on May 22nd, DFG will need to perform an additional site inspection to reevaluate the need for a permit.

If you have any questions, do not hesitate to give me a call at the phone number below. Thank you for your time.

Sincerely,
